# SAVE THE BAY®

NARRAGANSETT BAY

what drains into the ocean, drains into you.

Dirty water from roads flushes directly into our water supplies following storm events. The result: water that is toxic to both fish and humans.

## Stormwater Media Advocacy Westerly, Rhode Island

imagine how the fish feel.

Dirty water from roads flushes directly into our water supplies following storm events. The result: water that is toxic to both fish and humans.

[www.facebook.com/keepitclean](http://www.facebook.com/keepitclean)

where does all that water go?

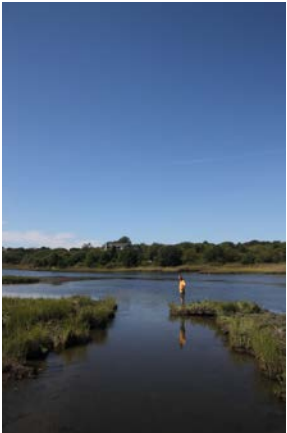

into our rivers, that's where.

Dirty water from roads flushes directly into our water supplies following storm events. The result: water that is toxic to both fish and humans.
